## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments with respect to the claims of record have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 21-26 and 47-49 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 21, line 8, "exit port" lacks antecedent basis.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 4, and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Koblish (2001/0020174). Applicant's attention is directed to Figures 16-20. Figure 17 shows the helical tapering portion. In paragraph [0087], the use of a guidewire 136 that exits through a lumen in the outer probe body is disclosed for these embodiments.

Art Unit: 3739

Claims 1, 7, 8, 14, 15, 20, 27, 28, 30-32, 35-38, 42-44, and 54 are rejected under 35 U.S.C. 102(e) as being anticipated by *Bowe et al* (6,771,996). The reference discloses in Figure 8 the basic device including an outer catheter having ablative elements and an inner catheter having diagnostic elements. At column 11, lines 1-2 and 8+, the reference discloses the use of different sized arcs and tendons to adjust the sizes of the arcs, allowing the ablative elements to be within the pulmonary vein.

***Allowable Subject Matter***

Claims 9, 11, 12, 50-53, and 55-59 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 21-26 and 47-49 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
